JOB DESCRIPTION

Job Title	Moodle Workplace / LX Developer	Employment Type	Independent Contractor (Project-Based)
Location	Remote	Period of Performance	Through project completion (estimated 6–8 months)
Status	**Open role** ⌄		

JOB SUMMARY

Yvette Gavin Consulting (YGC) is seeking an experienced Moodle Workplace / Learning Experience (LX) Developer to support a federal workforce development program. This is a remote, project-based independent contractor role focused on building asynchronous learning experiences directly inside Moodle Workplace.

The role supports leadership and professional development content designed by YGC and requires hands-on Moodle build experience.

JOB RESPONSIBILITIES

Key Deliverables	- Build LXs natively in Moodle Workplace using core tools and approved plugins (e.g., H5P) - Create course shells, learning activities, assessments, and completion rules - Develop interactive elements such as scenarios, guided exploration, and application activities - Implement revisions based on stakeholder feedback - Ensure accessibility and usability standards are met - Test LXs in sandbox and staging environments
Required Skills	- Proven experience building courses directly in Moodle or Moodle Workplace - Strong knowledge of Moodle native tools (lessons, quizzes, questionnaires, assignments, forums) - Experience with H5P or similar Moodle-compatible interactive tools - Experience developing asynchronous learning content - Ability to work independently and meet fast-paced timelines
